

# Bottle Blocker®

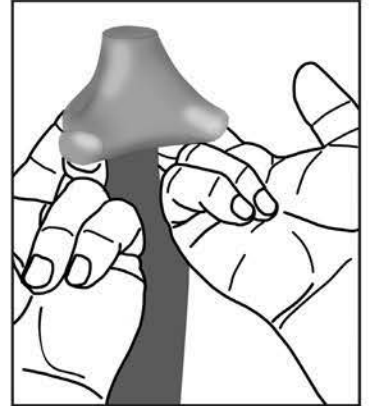

The Bottle Blocker is a patented, tamper-proof, locking device that you put over the cap of any liquor or pill bottle to prevent unauthorized access.

It can also be used as a child safety lock on bottles under your sink that might get into the hands of young children.

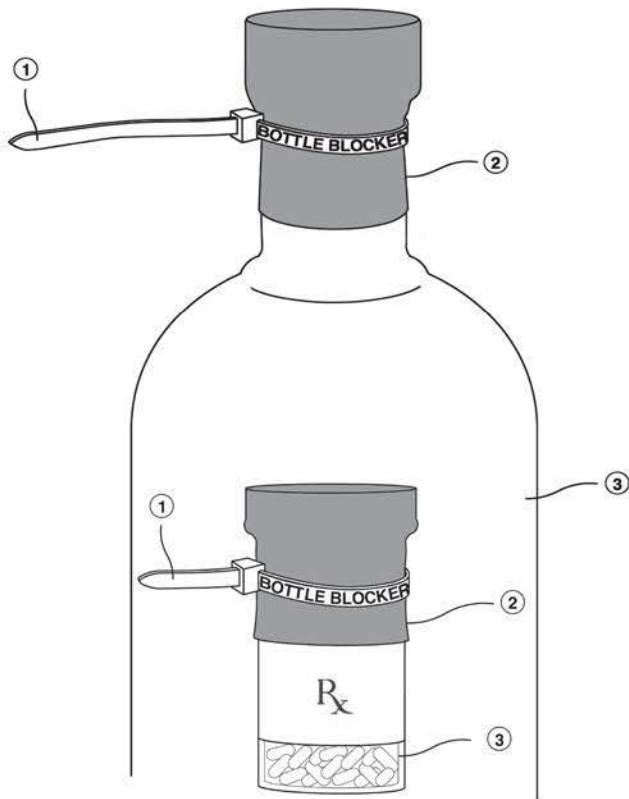

Custom Latex Caps

**Your BOTTLE BLOCKER kit comes with 24 of our custom latex caps, along with 24 of our custom imprinted locking ties.**

Custom Imprinted & Numbered locking tie

**INSTRUCTIONS:** To use our product, take one of the custom latex caps from its poly bag. First place one finger from each hand into the open end of the cap. As you stretch the cap add a second finger from each hand. This gives you 4 points to stretch the cap over the top of your pill bottle or liquor bottle (see image above). As you stretch outwards to get it over the top, pull down as far as it will go and release the cap. It should cling to the bottle and conform to the bottles shape.

Now take one of our custom tamper-proof locks and wrap it around the neck of the bottle so that it is positioned over the latex cap. Insert the tail of the lock into the open end so that the BottleBlocker name is showing on the outside. Pull the locking tie tight. You can either clip off the tail of the tie or leave it on.

It should look like one of the two drawings on the left. The locking tie is labeled part 1 in the drawing. The latex cap is part 2. The bottle is labeled part 3.

The tamper-proof lock needs to be cut off, in order to remove it. Once it is removed it can not be put back by an unauthorized user. Keep your extra supplies out of the reach of unauthorized users.

**Look for our *Deluxe Bottle Blocker Kit* available on our web site, it includes a locking box which can be used to hold pill bottles you use often. It can also hold your extra supplies and a cutter to remove the locking ties.**
